

How to use

Wash your hands before you start.

Shake well before use.

Twist off the bottle cap. After the cap is removed, if the tamper evident snap collar is loose, remove it before using the medicine.

Do not touch the dropper with your fingers when opening or closing the bottle. It could infect the drops.

Hold the bottle, pointing down, between your thumb and fingers.

Tilt your head back.

Pull down your lower eyelid with a clean finger, until there is a 'pocket' between the eyelid and your eye. The drop will go in here (picture 1).

Bring the bottle tip close to the eye. Do this in front of a mirror if it helps.

Do not touch your eye or eyelid, surrounding areas or other surfaces with the dropper. It could infect the drops.

Gently press on the base of the bottle to release one drop of SIMBRINZA.

Do not squeeze the bottle: it is designed so that a gentle press on the bottom is all that it needs (picture 2).

To reduce the amount of medicine that could come into the rest of the body after application of the eye drop, close your eye and apply gentle pressure to the corner of the eye next to the nose with a finger for at least 2 minutes.
